summary

In my career, I have been participating in several projects (in the areas of financial services, telecommunications, agribusiness, among others) in which I use Big Data and Analytics technologies, working mainly with engineering and data analysis. In this way, I was able to become familiar with the AWS environment (Redshift, S3, EC2, EMR, DynamoDB and Cloud9) and with agile design methodologies (Scrum) and Kanban, in addition to common work practices at startups. Graduating in Information Systems at USP, I am interested and seek to delve into topics related to Big Data architecture, data engineering and data science.

experience

11/2019
currently

Leap (KPMG & Distrito)

São Paulo, SP

Data Hacker

I work with different teams and projects helping to develop solutions for clients. In order to offer innovation to clients' processes and businesses, the focus of my work is on data capture, processing and visualization. To achieve our goals, the work is carried out in multidisciplinary teams, however, everyone actively takes part in the decisions, mixing the technical skills with the business ones. Currently, I am responsible for all data engineering and data analysis of people transformation products, creating a better experience for users.

Main tools:

- Data Processing: pandas, nltk, numpy, matplotlib and ppx (Python libraries).
- Data Visualization: Power BI.

Gympass

São Paulo, SP

Data Analyst

I worked in the product team helping to understand and correlate data, bringing new visualizations and insights, besides stimulating the improvement of the architecture of events, proposing improvements and evolutions.

Main tools:

- Data Visualization: Metabase.
- Programming: SQL.

Accenture

São Paulo, SP

Big Data Analyst

1st Project: development of new processes in the Big Data architecture in order of providing data to feed marketing campaigns.

2nd Project: data ingestion project, tables' parquet generation with Spark and data lake ingestion (HDFS).

Main tools:

- Project Management: Confluence, Jira, MS Teams, Pipefy, Scrum and Kanban.
- DevOps: Cerberon.
- Big Data: Cloudera, DynamoDB, EC2, Elasticsearch, EMR, Hadoop, Hive, Hue, Impala, Redshift, S3 and Spark.
- Programming: Shell Script, Python and SQL.

education

02/2016

currently

Bachelor in Information Systems
(general average 7.9, 10th place of 120 students)

USP

other qualifications

currently

Statistics for Business Analytics and Data Science A-Z (7 hours course)

Udemy

02/2019

Hadoop Foundations - Level 1 (5 hours course)

Cognitive Class - IBM

11/2018

Big Data Foundations - Level 1 (3 hours course)

Cognitive Class - IBM

10/2018

Big Data Analyst (certification)

Itcerts

10/2018

Big Data Foundation (certification)

Itcerts

10/2018

Cloud Security Foundation (certification)

Itcerts

10/2018

Data Governance Foundation (certification)
